SUMMARY

Full-Stack Developer with hands-on experience building production-grade web applications using Node.js, Express.js, React, and Next.js. Proficient in both SQL and NoSQL databases, real-time systems, and RESTful API design. Passionate about clean backend architecture, authentication flows, and shipping products that work reliably at scale.

SKILLS

Languages: JavaScript, TypeScript

Frameworks & Libraries: React, Next.js, Express.js, Node.js, Tailwind CSS, Convex

Databases & Backend: MongoDB, PostgreSQL, Convex (real-time), Drizzle ORM, Mongoose, Clerk, Cloudinary, JWT

Developer Tools: Docker, Git, GitHub, Postman, VS Code, Vercel

PROJECTS

Tars Chat – Real-Time Messaging App Live Demo | GitHub

- Built a full-stack real-time chat app with **Next.js 14**, **Convex**, and **Clerk** – live messaging, typing indicators, and online/offline presence with no WebSockets
- Built group chat, message reactions, and unread counts with a fully mobile-responsive UI
- Integrated Clerk authentication with JWT-based sessions and heartbeat-driven presence tracking

Flagify – Multi-Tenant Feature Flag Management System Live Demo | GitHub

- Built a multi-tenant feature-flag platform with **Node.js**, **Express**, **MongoDB** – 14+ RBAC-protected REST endpoints across 3 roles with custom JWT auth
- Enforced org-scoped data isolation at the query, API, and middleware layers via JWT claims, blocking cross-org access even with valid credentials
- Designed a compound unique index on `(organization, key)` for per-tenant flag-key uniqueness

URL Shortener – Backend API Live Demo | GitHub

- Built a RESTful API service for generating short URLs and redirecting to original URLs using Node.js and Express.js
- Implemented MongoDB database with Mongoose ODM for efficient data storage and retrieval
- Integrated NanoID library to generate unique short URL identifiers with collision prevention
- Developed visit history tracking system to record timestamps and analytics for each URL access

EXPERIENCE

Project-Based Experience Present

Full-Stack Developer Remote

- Developed and deployed full-stack applications managing frontend, backend APIs, and databases for platforms like Flagify, URL Shortener, and Tars Chat
- Implemented features using MERN stack, Next.js, and real-time technologies with agile methodologies for planning, testing, and deployment
- Collaborated with developer communities for debugging and optimization, implementing best practices for performance and user experience

EDUCATION

Jawaharlal Institute of Technology (Borawan), Khargone 2022 – 2026

Bachelor of Technology (B.Tech) in Computer Science CGPA: 6.74/10

Vimala Convent Higher Secondary School, Sanawad 2022

Higher Secondary 65%
