Mirza Danish Baig

danishmirzamirza001@gmail.com | mirza-danish-384b33245 | Daniel001x | enginronx.vercel.app

Education

Jawaharlal Institute of Technology (Borawan), Khargone *2022 – 2026*
Bachelor of Technology

Experience

Full-Stack Developer *Present*
Project-Based Experience

- Developed and deployed full-stack applications managing frontend, backend APIs, and databases for platforms like VidTube, URL Shortener, and Tars Chat
- Implemented features using MERN stack, Next.js, and real-time technologies with agile methodologies for planning, testing, and deployment
- Collaborated with developer communities for debugging and optimization, implementing best practices for performance and user experience

Projects

Tars Chat – Real-Time Messaging App Daniel001x/Tars-chat

- Built a full-stack real-time chat application using **Next.js 14**, **Convex**, **Clerk**, and **TypeScript** with live deployment on Vercel
- Implemented real-time features including live messaging, typing indicators, and online/offline presence using Convex's reactive query system – no WebSockets required
- Built group chat, message reactions, delete messages, unread message counts, and auto-scroll with fully mobile-responsive UI
- Integrated Clerk authentication with JWT-based session management and automated user presence tracking via heartbeat system

VidTube Daniel001x/vidtube

- Developed a comprehensive backend API for a video sharing platform using Node.js, Express.js, and MongoDB Atlas
- Implemented secure user authentication and authorization using JWT (JSON Web Tokens)
- Integrated Cloudinary for efficient media file uploads and storage, handling both images and videos
- Built RESTful API endpoints for user management, video operations, and content delivery

URL Shortener – Backend API Daniel001x/short-url

- Built a RESTful API service for generating short URLs and redirecting to original URLs using Node.js and Express.js
- Implemented MongoDB database with Mongoose ODM for efficient data storage and retrieval
- Integrated NanoID library to generate unique short URL identifiers with collision prevention
- Developed visit history tracking system to record timestamps and analytics for each URL access

Technical Skills

Languages: JavaScript, TypeScript

Frameworks & Libraries: React, Next.js, Express.js, Node.js, Tailwind CSS, Convex

Databases & Backend: MongoDB, Convex (real-time), Drizzle ORM, Clerk, Cloudinary, JWT

Developer Tools: Docker, Git, GitHub, Postman, VS Code, Vercel
